

Innoviris

RETHINKING HEALTH

Agenda

2.00 pm – **Welcome**, Marie-Carmen Bex, Deputy Director
General of Innoviris

2.15 pm – **Definition of health**, Arsenic

2.30pm – **Panelist discussion about the Health portfolio**

4.00 pm – **Round table discussions**

5.00 pm – **Research platform « Towards a healthcare
society »**

Health definition

ARSENiON

CENTRE SCÉNIQUE ITINÉRANT

Panelist discussion

Panelist discussion

Camille Besombes
(Institut Pasteur Paris)

Diederik De Cock
(Epidemiology Professor VUB)

Nathalie Trussart
(Philosophy Assistant Professor
HE Ferrer)

Florence Horicks
(Health Division ULB)

Jacques Moriau
(Research Manager ULB)

Sandrine Roussel
(Research Manager UCLouvain)

Roundtable discussion

Roundtable discussion

- Choose 1 of the 5 topics :
 - Epistemic shift from disease to health
 - Holistic approach to health
 - Toxicology, proofs, standards and thresholds
 - Needs-based research organization models
 - Health at what price? What kind of healthcare and social protection system?

Research platform

-

Project call by Innoviris

Innoviris

« We fund your future »

Innoviris is the public organization that funds and supports research and innovation in the Brussels-Capital Region.

**OUR
SUBJECTS**

**Applied
research**

**Technological
innovation**

**Social
innovation**

OUR BENEFICIARIES

Companies

Entrepreneurs

Research institutes

**Universities and
colleges**

Non-profit

Public sector

Citizens

Research platform

Towards a healthcare society

Research platform : Objective

Research projects to foster collaboration between Academia

Funding Scheme

!! IP created by acad is not free for the mentor!

Min 2 research groups from
independent research
Institutions

Funding: **100%**

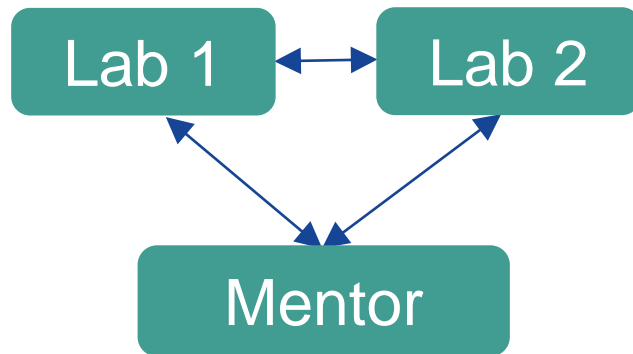

Min 1 entity partner (all
types of entities)

No funding*

**Possible funding for Collaboration level 5 mentor*

Collaboration scheme

- No restrictions on configurations

- Project duration: **2 - 3 years**

Project requirements

Brussels capital region

- **Research institutions** with activities in **BCR**
- Min 1 of the **mentors** in **BCR**
- The **project relevant to the BCR**:
 - mid to long-term **valorization** of the results (transferring knowledge, methodologies and technologies to companies, organizations and institutions, development of new practices, organization, processes, services...)
 - **Impact on** the economical, societal and environmental landscape

Mentor collaboration levels

LEVEL 1

Inspiration/technology watch

The mentor takes an active interest in the project. A representative takes part in project follow-up committees or dissemination activities to keep abreast of results.

LEVEL 2

Challenging

The mentor maintains more regular contact and interaction with the research consortium. He/she provides active feedback on the project.

LEVEL 3

Collaboration

The mentor shares his or her expertise and project results with the consortium and offers access to its facilities. More time and human resources are involved.

LEVEL 4

Pilot case

The mentor provides a case study, within his facilities or activities. He is involved in defining the pilot case and can benefit from it.

Collaboration level 5

LEVEL 5

Effective collaboration

Within the mentor's facilities, specific human resources are dedicated to the project, and the mentor carries out some of the project-related tasks. The mentor is therefore a research partner.

Funding possibility for economic mentor

Type of economic entity	Intervention rate
Small entity	80%
Medium entity	75%
Large entity	65%

Evolution of the RPF call projects

Year	Theme	In	Eligible	Financed
2016	Energy harvesting, storage and management @ device and μ grid levels.	8	4	2
2017	Health : « personalized medicine and integrated care »	19	18	6
2019	Environment: « Green Chemistry »	8	7	7
2022	Health : New Approaches of Testing	10	10	4
2024	Towards sustainable digitalization	4	3	Under approval

Submission process

1

Deadline – 28/06

Expression of interest

- **Relevance** of the project to the **theme**
- **Eligibility** of research organizations and mentor(s).

2

Deadline – 30/10

Full proposal

- **Relevance** of the project to the **theme**
- **Eligibility** of research organizations and mentor(s).
- **Jury evaluation**

Calendar of the call

1/04 : Launch of the call

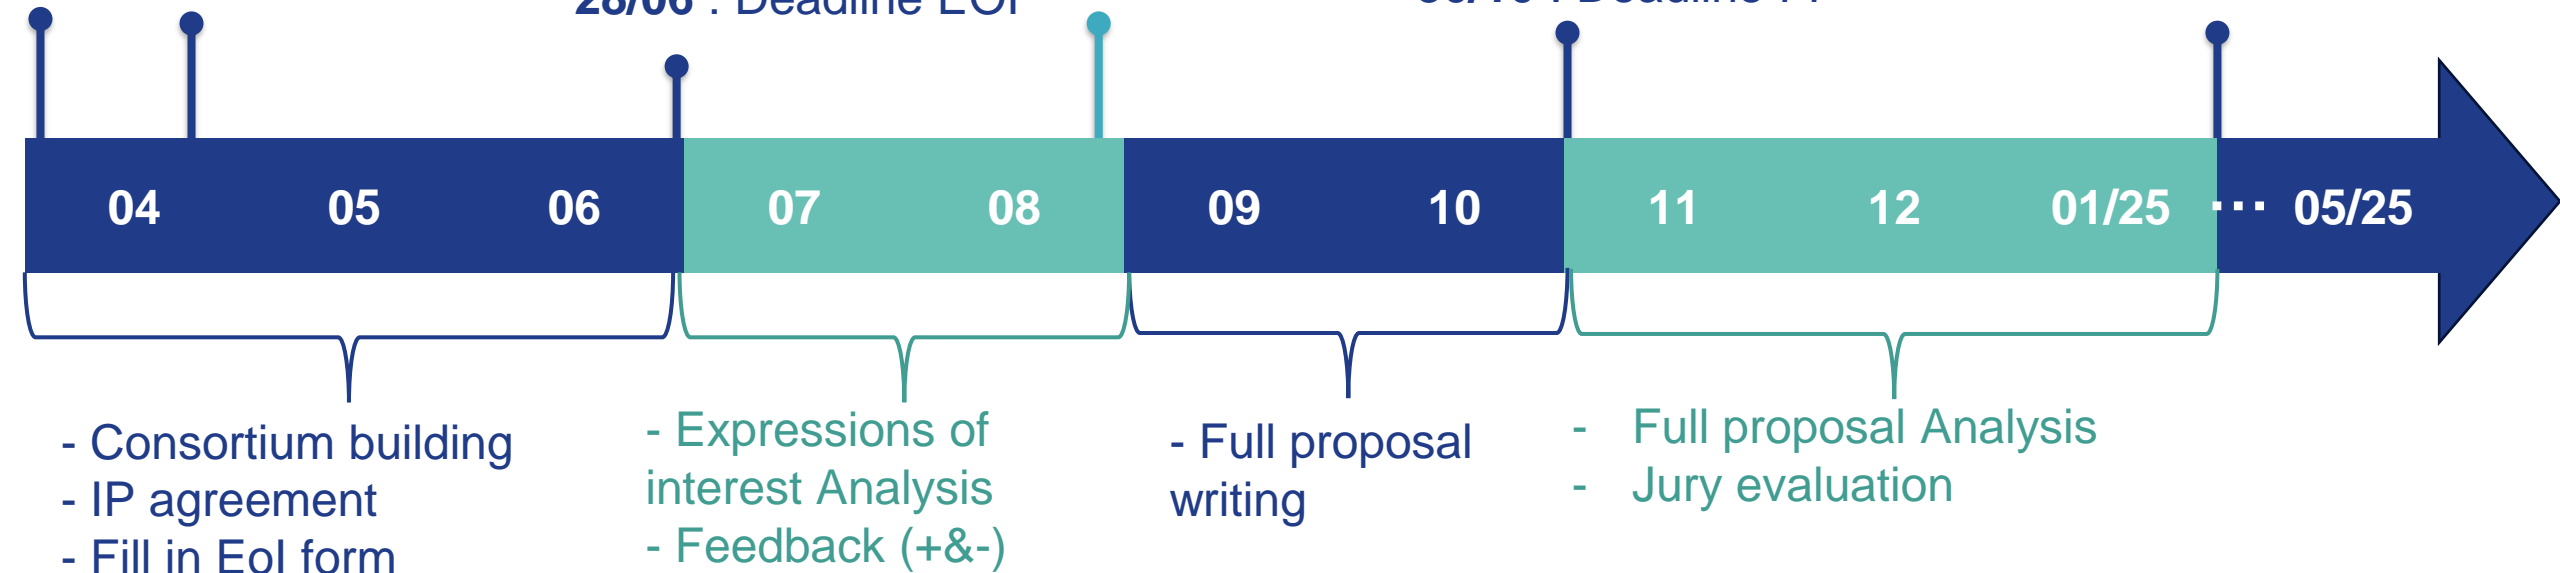

18/04 : Info session

28/06 : Deadline EOI

19/08 : Opening full proposal

30/10 : Deadline FP

1/05/2025 : Start date of the project

Thematic areas

+50

Examples of research proposals

Epistemische verschuiving van ziekte naar gezondheid

Modellen definiëren voor het organiseren van onderzoek dat inspeelt op concrete noden

Gezondheid tegen welke prijs?
Wat voor zorgstelsel en welke sociale bescherming?

Holistische gezondheidsbenadering

Toxicologie, bewijs, normen en drempels

Déplacement épistémique de la maladie vers la santé

Définir des modèles
d'organisation de la recherche
ancrés sur les besoins

Approche holistique de la santé

La santé à quel prix ? Quel
système de santé et de
protection sociale ?

Toxicologie, preuves, normes et
seuils

Thank you !
