You want to discover the scientific activities in your neighbourhood?

You love science competitions but don’t know where to find them?

You want to discover new technologies with your class?

Then this catalogue is what you’re looking for!

You will find everything Brussels has to offer classified by municipality.
ACTIVE IN THE BRUSSELS REGION

BRUXELLES-VILLE
Initiated by the Royal Belgian Institute of Natural Sciences and Google.org, XperiBIRD.be hands on nest boxes to schools, equipped with a camera controlled by a nanocomputer. These allow classes to discreetly follow the nesting of a pair of titmice. The project also allows young people to be involved in a participative science project that combines natural sciences and technologies.
XperiLAB.be is a mobile lab that has been designed to increase (young) people's interest in science. The concept: boarding a truck to carry out various scientific experiments in the fields of biology, chemistry, physics and technology. These experiments present a triple challenge: to succeed in the proposed research with a time limit of 15 minutes and by saving as many points as possible.

Ohme is a creative label that produces educational, cultural and participatory content at the intersection between Arts and Sciences. With its multidisciplinary team of professionals from the cultural sector, civil engineers and entrepreneurs as well as its large network, Ohme develops content that redefines the boundaries between different artistic practices and the learning of scientific knowledge.
MIC Brussels is a public-private partnership that supports the IT sector in Brussels. MIC Brussels organises coding & robotics activities for kids to help them understand the basics and show their importance in our current society. MIC also works with teachers to help them discover and use IT collaboration tools.

The goal of the "Focus Research" non-profit association is to support the development of the (future) career of researchers in Belgium. To help them, the association provides coaching sessions, training, information and themed workshops and events.
Open Knowledge Belgium is an umbrella organisation that unlocks information, enabling people to use and share knowledge. The Open Knowledge network facilitates knowledge sharing and crossovers between different organisations and cultures, connecting its four main actors: the open community, researchers, governments and industries.
Gluon explores the interactions between exact and social sciences, people, their technological achievements and their environment. The organisation offers exhibitions, workshops and artistic residencies in companies and universities. Gluon also brings together different STARTS-initiatives (Science, Technology & Arts) aimed at teenagers between 14 and 18 years old.

Solvay teams up with Brussels institutions to organise a competition between student teams. The competition comprises a pre-selection and a final. Its goal is to reveal the reality of a research laboratory in a company, as well as to highlight the scientific career opportunities of women in industry. The winning team has its first year of higher education funded by the Ernest Solvay Fund.
